# Color-Helper™

Color coordination tool with Ambiance™ color harmony technology

**Love your colors!**

The Color-Helper is a lightweight, portable, and easy-to-use color coordinator. It measures a “starting color” then helps you pick matching and accent colors for your project. The Color-Helper enables you to pick colors like a pro –faster, easier, and with greater confidence than ever before. It’s the tool of choice for both professionals and do-it-yourselfers.

## Top 4 reasons to get a Color-Helper:

“There are just too many color choices...”

The Color-Helper gives you a “short list” of recommendations.

“I can’t visualize whether colors will look right together...”

The Color Helper tells you if a combination of colors will work.

“I need some good advice about my color scheme...”

Get professional recommendations on the spot with the Color-Helper’s Ambiance harmony technology.

“I need to pick colors, but where should I begin...”

The Color-Helper generates ideas for your project.

## The Color-Helper is packed with useful features:

Three powerful **Matching** functions:

**Identify** If you have a sample of the color you want, the Color-Helper will identify the closest matching paint color.

**Compare** If you have a sample of a color that might be close to what you want, the Color-Helper will tell you how close.

**Remember** If you have a color that you want to keep with you, or one that can't be moved, the Color-Helper will record the color in memory.

Three powerful **Harmony** functions that use a “starting color” to:

**Advise** If you have a companion color in mind, the Color-Helper will tell you if most people would say that it harmonizes.

**Suggest** If you know generally what color you want, blue, for example, the Color-Helper will suggest three specific harmonizing shades.

**Inspire** If you're looking for ideas, the Color-Helper will generate harmonizing companion color ideas.

## Specifications:

Size:	approx 4"x 5"x 2"
Weight:	8 oz. with battery
Power:	standard 9V battery
Colorset:	Superpalette
Capacity:	approx 23,000 colors
Functions:	3 matching, 3 harmony, plus Select Database and Clear
Updatable:	Yes, with optional PC-Link
